LLM Semantic Guidance
optional; off in headline (α = 0)
prior
STEP 1
Structured Search
Compressed trie stores each design exactly once
STEP 2
Smart Traversal
Rank-UCB + mutation propose new designs
STEP 3
Cheap Filtering
Label-free proxies send only the top 35% on
STEP 4
Benchmark Evaluation
Validation-accuracy lookup + GPU-h cost
STEP 5
Search Result
Best-validation design: test accuracy, GPU-h
feedback: node statistics updated each iteration until the evaluation budget is spent
candidate flow
